

Project Overview

SwiftShip Tracker: Book. Track. Deliver. Smarter.

SwiftShip Tracker is a Salesforce CRM solution that simplifies parcel booking, shipment tracking and delivery management. It covers the full parcel lifecycle from booking and dispatch through tracking and delivery confirmation. Four custom objects (Parcel, Delivery, Sender, Receiver) hold the data. Flows automate updates, and AgentForce AI with Prompt Builder lets customers ask about a parcel in plain language.

Purpose

- Centralize parcel and delivery information.
- Simplify parcel booking and tracking.
- Provide real-time shipment visibility.
- Automate delivery updates and customer notifications.
- Enable conversational tracking using AgentForce AI and Prompt Builder.
- Improve agent efficiency through Flows and dashboards.
- Provide secure, role-based access to customers, agents, support staff and administrators.

Phases in this document set

- 1 Phase 1: Ideation
- 2 Phase 2: Requirement Analysis
- 3 Phase 3: Project Design
- 4 Phase 4: Project Planning and Scheduling
- 5 Phase 5: Development
- 6 Phase 6: Testing and Security Validation
- 7 Phase 7: Deployment, Documentation and Maintenance
- 8 Wrap-up: Advantages, Disadvantages, Conclusion, Future Scope
