

Phase 1: Ideation

Understand the problem and choose the solution.

Problem statements

ID	User	Trying to	But	Feels
PS-1	Customer / Sender	Book a parcel easily	Booking needs support or multiple apps	Frustrated
PS-2	Customer / Sender	Track a parcel	No simple real-time tracking	Confused
PS-3	Delivery Agent	Update parcel status	Updates need manual handling	Concerned
PS-4	Customer	Receive delivery updates	Notifications missing at some stages	Uncertain
PS-5	Admin	Monitor parcel operations	Flow and performance are hard to monitor	Concerned

Empathy map: Customer / Sender

- **Think and feel:** wants simple booking and tracking without contacting support.
- **Hear:** delivery confirmations and status updates.
- **See:** parcel details, tracking status, estimated delivery date.
- **Say and do:** books parcels, checks status, asks for updates.
- **Pain:** delays, confusion, dependence on support or several apps.
- **Gain:** real-time visibility, self-service tracking, timely notifications.

Ideas considered

- Manual registers
- Spreadsheet tracking
- Standalone parcel portal
- Salesforce CRM with AgentForce AI

Final selection

Salesforce CRM with AgentForce AI was selected for centralized parcel management, Flow automation, real-time tracking visibility, conversational AI assistance, secure role-based access, and reports and dashboards.
